

Keep IT GREEN *aka:* SHARING ETIQUETTE

The best flavor and effects come from smoking GREEN flowers.

Once no more green is visible, FLIP the bud over to expose the un-burned green flower below.

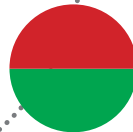

When packing a bowl, PLACE small buds one at a time to give each person an opportunity to enjoy the green flowers.

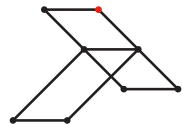

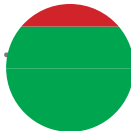

Once the bud turns BLACK, the majority of aromatic compounds are gone and only some psychoactive compounds remain.

Putting a flame to the green flower VOLATILIZES its aromatic compounds producing flavor and a range of effects.

Draw in the flame to the edge of the bowl to light only the edge of the green, and PASS it while it's still visible.
